Surabaya, East Java

SUMMARY

Enthusiastic Information Systems student with experience in several projects and organizational activities. Proficient in programming languages such as Java, Python, Java Script, HTML, CSS, and SQL. Actively participated in several team and individual projects focused on machine learning engineering, AI, web/app development, project management, UI/UX design, business solution and data analysis. Apart from that, have good interpersonal skills such as public speaking, teamwork, high initiative, time management, critical thinking, problem solving and leadership. Seeking to apply knowledge and skills in an industry setting through the internship program to develop professional abilities and expand industry connections.

EDUCATION

2022 - Present | University of Pembangunan Nasional “Veteran” Jawa Timur

Bachelor of Information System | GPA : 3.86

2024 | Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Distinction Graduate of Machine Learning Path | Final Score : 96.8

Area of Interest : AI/Machine Learning, Website/Application Development, Data Analysis, System Analysis.

PROJECT

2024 | Tanamore | Mobile App and Machine Learning-Based Solution to Detect Plant Disease and Give Treatment Recommendations

- Developed by implementing Machine Learning, Cloud Computing, and Mobile Development. The app features include User Registration, Login Plant Disease Detection, Treatment Recommendation, Encyclopedia, Plant Identification, Plant Watering Reminder, and KebunKu.
- Role : Developing the Machine Learning Models using TensorFlow for two main features, Plant Disease Detection and Plant Identification with 97% accuracy.

2024 | Eco Harmony | Smart Village Website Developed using PHP with Laravel Framework

- The website features include user registration, login, waste bank, informative news and tips about the environment, and sales of environmentally friendly products
- Role : Database and Front-End Developer

2024 | Ticketify | Mobile-Based Online Transportation Ticket Booking Application

- Developed using Kotlin and SQLite with Android Studio Tools
- Role : Front-End and Back-End Developer

2024 | Snake Game | Web-Based Game Created Using HTML, Java Script, and CSS Programming Language

- Developed and implemented the core game logic for the snake movement, food generation, and collision detection using JavaScript.
- Designed the game's user interface, including the game board, background canvas, score display, and start buttons using HTML and CSS.

2023 | HOME.SC | Desktop-Based Shoe Laundry Cashier Application Created Using Visual Basic and MySQL

- Developed and implemented the core functionalities of the shoe laundry cashier application using Visual Basic.
- Designed the database schema to store customer data, orders, services, and transactions using MySQL.
- Implemented database connectivity and CRUD operations (Create, Read, Update, Delete) within the application.

2023 | Home.Shoescare | Design and Build a Mobile-Based Shoe Laundry Information System

- Designed the entire application starting from feature planning, Data Flow Diagram and Usecase Diagram, Usecase Text, Class Diagram, Robustness and Sequence Diagram, Conceptual Data Model (CDM) and Physical Data Model (PDM), and also designed database structure using MySQL.
- Created wireframes and interactive prototypes using Figma to visualize the user interface and user experience.

2023 | MA Cayes | User Interface Design for Car Buying and Selling Using Design Thinking Method

- Utilized the Design Thinking method to conduct user research, including interviews and surveys, to gather insights on user needs and preferences for car buying and selling.
- Developed detailed wireframes, user personas, and high-fidelity prototypes using tools like Figma, ensuring a user-friendly and visually appealing interface.
- Conducted usability testing and iterative design improvements based on user feedback to enhance the overall user experience and functionality of the application.

2024 | LeftToLove | Mobile Based Food Commerce Application E-Business Ideas to Campaign Zero Waste Food

- Conduct business analysis including brainstorming sessions, SWOT analysis, user interviews, and Business Model Canvas (BMC) analysis to develop sustainable zero-waste food trading ideas.
- Develop user personas, empathy maps, and conduct competitor analysis to ensure user-centric and competitive product design.
- Create interactive wireframes and prototypes using Figma

ORGANIZATION

2024 | Head of Advocacy Department | Himpunan Mahasiswa Sistem Informasi UPNVJT

- Providing both academic and non-academic assistance, such as MBKM and Thesis assistance, serving and accommodating student aspirations, conveying scholarship information, as well as being a liaison between students and the bureaucracy.

2023 | Staff of Advocacy Department | Himpunan Mahasiswa Sistem Informasi UPNVJT

- Serving and accommodating student aspirations, conveying scholarship information, providing academic and non-academic assistance, and being a liaison between students and the bureaucracy.

AWARD AND ACHIEVEMENT

2025 | Distinction Graduate of Machine Learning Path at Bangkit Academy 2024 Batch 2

- Successfully graduated from the Bangkit Academy program led by Google, Tokopedia, Gojek, & Traveloka with the title of "Distinction Graduate" which achieved the 10% highest score participants with a total score of 96.8

2024 | Achieving Top 50 Capstone Project at Bangkit Academy 2024 Batch 2 with Tanamore

- Tanamore is a Machine Learning-powered app designed for farmers and urban farming enthusiasts to detect plant diseases, provide care recommendations, access detailed plant information, and manage watering and harvest schedules. Tanamore was selected as one of the Top 50 Capstone Projects selected from more than 600 projects.

SKILLS

Language

- Indonesian (Native)
- English (Intermediate)

Skills

- AI & Machine Learning Development, Web/Mobile App Development, UI/UX Design, Project Management, System & Data Analysis, Network Design

Soft Skill

- Public Speaking, Problem Solving, Time Management, Teamwork, Leadership, Analytical and Critical Thinking

Programming Language

- Python, Java, HTML/CSS, JavaScript, Visual Basic, SQL, Kotlin

Tools

- Github, Microsoft Office (Word, Excel, Power Point), Android Studio, Visual Studio Code, Streamlit, Jupyter Notebook, Google Collaboratory, Cisco Packet Tracer, XAMPP, Oracle, StarUML, PowerDesigner, Figma, Canva, Maze, Microsoft Project, Visual Studio 2022, Netbeans IDE, IntelliJ IDEA, Bizagi Modeller, Google Workspace.
